

Your New Custom-crafted Eyeglasses from Toronto Eye Care

Congratulations on purchasing your prescription eyewear from Toronto Eye Care. Our prescription eyewear is a complete reflection of our total care philosophy at Toronto Eye Care.

Each frame, each lens is personally selected to optimally suit your vision care needs and maximize your overall satisfaction. *We guarantee it.*

Toronto Eye Care Eyeglasses Handling and Care Instructions

✓ **Handling and Care Instructions**

- Your prescription eyeglasses are fabricated from the highest quality products, however it is very important to handle them gently
- To ensure peak **lens** performance we recommend:
 - washing your lenses in a solution of warm water and regular dish soap (non antibacterial moisturizing)
 - Dry your eyeglasses with lint-free paper towel and gently polish the lenses with your lens cloth
 - anti-reflection and anti-scratch coatings are meant to enhance the performance of your eyeglasses, but can be damaged by abrasive surfaces and extreme heat
- To ensure peak **frame** performance we recommend:
 - washing your lenses in a solution of warm water and regular dish soap (non antibacterial moisturizing) and dry your frames gently with paper towel
 - frames are made from durable metals and plastics, but can be damaged by placing the frames on rough surfaces like table tops
- To ensure proper fit of your eyeglasses, regular frame adjustments in the Toronto Eye Care optical dispensary are recommended

✓ **Eyeglasses Adaptation**

- It is common for new eyeglasses to make you feel slightly nauseous, dizzy or uncomfortable for up to 2 weeks before you feel completely comfortable.
- If your discomfort extends beyond 2 weeks, please contact our office immediately

Thank you for choosing Toronto Eye Care for your prescription eyewear needs
